

### E/T Permit Annual Report Instructions

1. If you did not conduct any work or activities under your E/T permit in 2009, complete and submit the Annual Report Form only. Supplementary information is not required.
2. If you did work under your E/T permit in 2009, complete and submit the Annual Report Form and a supplementary attachment describing your work with listed species over the past year. To determine what information is required for this attachment, refer to the table on the next page. (If your specific work or activity is not mentioned in the table, please follow the instructions for the work or activity most similar to yours.) Please review your individual permit and amendment documents to see if you have additional reporting requirements beyond what is included in the table.
3. Reports are required for your permit file(s) in addition to any copies you may have provided to others within the Department of Natural Resources, and regardless of whether or not you wish to renew your permit. Failure to submit timely, complete, and/or accurate annual reports may result in revocation of your permit and confiscation of any endangered or threatened animals, plants, or specimens in your possession.
4. If you hold more than one E/T permit, a separate annual report is required for each permit.
5. All reports and supplementary materials should be typed or printed very clearly in ink, and should be as clear and concise as possible without sacrificing quality or important information. If you are submitting GPS waypoints, please send this information digitally if possible.
6. All supplementary information must either be attached to the completed Annual Report Form or (if sent separately) clearly labeled with the permit holder's name, the permit number, and the date.
7. The Natural Heritage Program cannot accept data derived from trespass. Please gain landowner/property manager permission before entering private property.
8. If any work or activities were done that violated one or more conditions of your permit or resulted in injury, damage, death, or removal from the wild of Endangered or Threatened species (outside of what is authorized by your permit), you must include a full description of those events in your report.

Report forms and materials should be sent by one of the following methods.

Mail:

Bureau of Endangered Resources  
Wisconsin DNR  
P.O. Box 7921  
Madison, WI 53707  
Attn: Stacy Rowe

E-mail:
